Water repellent is a coating added to fabrics to enhance resistance against rain.

TSA LOCK

Using TSA Approved locks allows your luggage to be unlocked and inspected by security authorities without damage.

RFID

RFID blocking material: RFID Micro chips can be found in your passport, credit cards and ID cards. Each chip emits radio transmissions which can be read and downloaded by thieves without you knowing by using a hand-held reader.

Our RFID-blocking material blocks transmissions and stops RFID readers from gaining access to your personal information.

SMART SLEEVE

Smart sleeve allows you to attach your laptop bag to your suitcase for easier mobility. Just slide your bag over the pull-handle of your trolley.
